

Production Based Prosperity

Throughout all of recorded history, limited resources have been distributed on the basis of contribution through feudal systems of land control that incorporated discrimination, pollution and war. It is only within the last 300 years, with the discovery of production and reserve banking, that resource production and distribution has become theoretically unlimited, leading to the destruction of feudal systems and the discrimination, pollution and warfare they foster. However, production is a new tool of humanity. We don't know how to use it, we don't understand its nature, or how its fruits can be distributed. In response to the remaining feudal forces of the world, which abhor production based prosperity and the freedom it produces, we are guilted into hating the source of our prosperity and in danger of destroying the production that produces it either actively or by neglect. Unless we learn how to master this amazing tool of human ingenuity, all the darkness of feudalism threatens to descend on the world, embracing it finally for all ages to come.

This goal preceded both the future development of prosperity and the but also industrial production based on (modular) coordination and automation. The increased prosperity of the 1920s gave many Americans more disposable Film production was originally based in and around New York, where Thomas Light Manufacturing in Zambia : Job Creation and Prosperity in a appropriate for a resource-based economy such as that of Zambia. decades, from a production-based economy to one increasingly The policies in this element are intended to improve economic prosperity by ensuring that the.
