

Language, Mind and Reality: A Reflection on the Philosophical Thoughts of R.C. Pradhan

The essays in this book delve into the central theme of R.C. Pradhans philosophy in particular and the issues in analytic philosophy in general. In analytic tradition, Professor Pradhans research has been extensively in the area of Wittgensteins philosophy: philosophy of language and philosophy of mind. While philosophizing the notion of language and mind, Pradhan explores the complexities of the web of life. For him, language neatly binds several aspects of life: the cultural, moral, religious, and scientific. The mind, however, represents the inner world of human experience that involves multiple dimensions of consciousness: the bodily, the vital, the mental, and the spiritual consciousness. Considering the broad spectrum of Pradhans works, the contributions in this book reflect mainly on the issues concerning the nature of metaphysics, mind, meaning, truth, and values. Language, Mind and Reality, in this regard, is a study on the contemporary trends in analytic philosophy.
