

Medical Coding ICD-10-PCs (Speedy Study Guides: Academic)

The "PCS" in ICD-10-PCS codes stands for the procedural classification system. ICD-10-PCS is a completely separate medical coding system from ICD-10-CM, containing an additional 87,000 codes for use ONLY in United States inpatient, hospital settings. The procedure classification system (ICD-10-PCS) was developed by the Centers for Medicare and Medicaid Services (CMS) in conjunction with 3M Health Information Management (HIM).

ICD-10-PCS is used only for inpatient, hospital settings in the United States, and is meant to replace volume 3 of ICD-9 for facility reporting of inpatient procedures. Due to the rapid and constant state of flux in medical procedures and technology, ICD-10-PCS was developed to accommodate the changing landscape. Common procedures, lab tests, and educational sessions that are not unique to the inpatient, hospital setting have been omitted from ICD-10-PCS.

Code(s)	Description
001607D	Section 0 - Medical and Surgical
102073Z	Section 1 - Obstetrics

Medical Coding ICD-10-PCS is the newest procedure coding system. There are a total of 72,081 codes included in ICD-10-PCS. Each of the seven alphanumeric characters used in each code represents something specific. A chart would be very beneficial in trying to decipher what each codes letter or number represents. For example, the first number of the code represents the type of service that was rendered. Other characters used represents a body system, body part or region, root operation, etcetera.
