

Advances in Brain Research: Cerebrovascular Disorders and Neurodegeneration: Proceedings of the 6th Hirosaki International Forum of Medical Science, ... 2002, ICS 1251, 1e (International Congress)

This volume is the outcome of the 6th Hirosaki international Forum that was aimed to update the recent studies on neurological disorders of mainly elderly patients, particularly vascular and neurodegenerative disorders. Specific topics include genetic background of cerebrovascular diseases. Recent advance in the study of vascular spasm after subarachnoid hemorrhage is another major subject. In the field of neurodegenerative disorders, special emphasis was laid on the therapeutic strategy of Parkinsons disease. Pathogenesis of other degenerative diseases such as Alzheimers disease is also a highlight of this volume.
